10 Star Hybrid Heat Pump

Begin drying quickly regardless of the external temperature, while saving money.* The Hybrid Heat Pump has a heater that preheats the air to the optimal drying temperature. A Heatpump then efficiently maintains the temperature by using 'refrigerant' to heat the air and recycling warm air.

AI Dry

Enjoy faster and more precise* drying using AI Dry with multi-sensing technology. By continually sensing the temperature and humidity of clothes in the drum it intelligently optimises the performance of the Inverter Compressor and Heat Exchanger. So your laundry is dried quickly and gently.

Auto Open Door

Avoid the frustration of having to wash clothes because they smell unpleasant if they are not taken out of the dryer immediately. When a drying cycle ends, Auto Open Door automatically opens the door to let humid air escape. So your laundry won't develop a musty odour being in damp conditions.

AI Control

Dry laundry easily and effectively with AI Control. It personalises drying by remembering your habits, suggesting cycles* and displaying timely information. The SmartThings App** offers advice on cycles, planning and troubleshooting. And it selects the ideal drying course for a wash cycle.***

*Tested in accordance with IEC 61121:2013/8kg Wash load/Cotton Cupboard with Heatpump(DV80F5E4HGW) vs. without Heatpump (DV80H4100CW). Individual results may vary. *Available on Android and iOS devices. A Wi-Fi connection and a Samsung account are required. **Based on an AI-created algorithm. Actual results may vary depending on individual use *Messages with cycle suggestions are displayed on a smartphone App. **Available on Android and iOS devices. A Wi-Fi connection and a Samsung account are required. ***Auto Cycle Link is only available when both the washer and dryer have AI Control and Wi-Fi connected.
